

## Rodents seen in Singapore – January 2024, Jonas Livet

### Mandai T15 Trail

*Sundamys annandalei*?... or *Rattus tiomanicus*?

First four following pictures from the same animal, fifth from another animal along the same trail (same night)

1 - 4

5

**Mandai T15 Trail**

*Maxomys surifer?* ... or *Sundamys annandalei??*

The three following pictures are from the same animal. That rat was approximately 160-180% larger and more stocky than the previous rat (seen previous page). It was also more brownish in color. Both rats were seen in the same tree consuming the same fruit but during different nights.

6 - 8

**Thomson Nature Park**

*Rattus tanezumi?*

9

**Mandai Wildlife Reserves**  
*Rattus tanezumi?*

10

11 - 12

13 - 14

**Mandai Wildlife Reserves**  
*Rattus tanezumi?* (juvenile)

15 - 16

**Mandai Wildlife Reserves**

*Rattus norvegicus?* All three following pictures from the same animal

17 - 19
