Summary

Led by the excellent local guide, Henry Sappingi, this tour to the relatively unknown, and incredibly exciting, Deramakot Forest Reserve delivered a wonderful and special range of species

Mammal highlights were plentiful and included the 'big-three' iconic primates; Bornean Orangutan, Proboscis Monkey and North Bornean Gibbon. The group were also treated to sightings of two smaller yet equally incredible primate species; Western Tarsier and Philippine Slow Loris. To the group's delight a wild Sun Bear was also seen. The elegant Leopard Cat was seen on most days and the marvelous Binturong was found on three days.

A highly impressive and enviable range of bird species were also seen with highlights including Storm's Stork, Blyth's Frogmouth, Wallace's Hawk Eagle, White-fronted Falconet, Blue-bearded Bee-eater and Common Flameback. Deramakot proved an excellent location for hornbills with Rhinoceros, Oriental Pied, Black, Bushy Crested and Wreathed all seen.

Reptiles are often encountered in Deramakot and highlights included the remarkable Flying Lizard, the beautifully marked Mangrove Snake and the endemic Striped Bornean Tree Skink. Amphibians included the amazing endemic Tree Hole Frog and the highly sought after Wallace's Flying Frog.

We were unable to acquire a detailed day to day write up but below is the full list of species that were encountered during the holiday
