

**TRIP REPORT JAGUARLAND RESERVE BOLIVIA 08 -10 OCT 2020**

**Trip duration:** 3 days

**Tour Company:** Nicks Adventures Bolivia

**Mammal species:** 17 Species excluding bat species

Another great trip to Jaguar land Reserve Bolivia, was a scouting trip to check and set up cameras as well as look for feline species. Was a successful trip especially with the Jaguarundi sighting but sad to see many fires in the region and very bad smoke from huge fires across the river.

## MAMMAL SPECIES

JAGUAR : 4 Jaguars including mother and cub from a distance, and two close up sightings at day and night. Sadly no pics as did not have the cameras ready

JAGUARUNDI : Incredible 5 minute sighting. Saw from a distance of 300m on a canal bank and it literally walked right past us

OCELOTS: 6 In one night including a mother and cub. We searched again on the 2<sup>nd</sup> night and not a single sighting.

LOWLAND TAPIR: One brief sighting at night in forest.

COLLARED ANTEATER: 1 Sighting at night. This was our first encounter of this species in 12 trips.

LESSER GRISON: Seen crossing the road in agricultural fields on route to the property. First ever encounter of this species in this region.

BOLIVIAN RED HOWLER MONKEY: A few small groups on route and inside the property. Less than usual.

BLACK TAILED MARMOSET: Large group in daytime. Only second recording of this species on the property.

WHITE LIPPED PECCARIES: brief sighting in Soya fields, first ever recording of this species in this region.

COLLARED PECCARIES: 2 sightings in Soya Fields and forested road

CAPYBARA: In plague proportions, everywhere

BROWN THROATED 3 TOED SLOTH: 4 Sighted in trees on route and inside property.

SOUTH AMERICAN COATI: 2 LARGE FAMILY GROUPS RECORDED. Less than normal

MARSH DEER: Around 10 sighted. Less than usual and only one large male recorded

CRAB EATING FOX: Over 10 sighted at night and day.

6 Banded Armadillo: 1 Seen running across the road on departure back to Santa Cruz

**\*\*\* CAMERA TRAPS SET UP ON THE PROPERTY ALSO RECORDED HIGH DENSITY OF JAGUARS, MARSH DEER AS WELL AS SOME RECORDING OF JAGUARUNDI AND PUMA**
